Experience

New Era Tech - UX Designer & Strategist (Consultant)

April 2022 - Now

- Created or contributed to the design and theming of 25+ commercial websites for a global healthcare company.
- Conducted an accessibility audit for two insurance websites using automated testing tools (Popetech, WAVE, Siteimprove) and manual testing methods (JAWS, keyboard) to check for compliance with WCAG 2.1 level AA.
- Designed the UI for a new iOS app for a hospital.
- Developed a responsive site using Bootstrap v5.2.1 for a cloud-based internal application for a government agency.
- Created and maintained new design system components built with Figma and React.

WorldTrips Travel Insurance - UI/UX Designer

July 2019 - March 2022

- Redesigned an online insurance purchase path, resulting in a conversion rate increase from 25% to 40%. Designed desktop and mobile wireframes, led usability testing sessions, documented results, and created user personas.
- Conducted research of a customer portal by collecting insights through surveys, heatmap data, and interviews with customers/agents. New portal design reflected research findings.

New York University - Digital Accessibility Designer (Contract)

October 2018 - February 2019

- Created a sitemap and wireframes for an improved and accessible website for Confluence, a platform for New York University - Gallatin.
- User tested and updated prototype based on feedback.
- Documented CSS specifications.

Johnson & Johnson - Insights & Experience Strategy Intern

June 2018 - August 2018

- Conducted interviews and created user journeys for clients going through a wellness program. Illustrated pain-points and areas of opportunity.
- Researched and created a visual ecosystem of company digital products and teams. Achieved goal of finding areas of overlapping projects
